Recap: what we did last week

- Textured & animated 3D models
- Base replacement grey box
- Animations
- Aiming down sights
- Spawn points
- Tank boss
- Big bug fixes

Jay (lead designer, level & visual)

- Level detailing and removing greybox
- QA testing
- Voice acting
- Voiceline implementation

• Examples:

• Duck:

• Enemy lines:

Selkie (narrative & gameplay designer)

- Playtesting
- Sick

Ingmar (team & engineer lead, product owner)

- Finished Gameplay Loop
- Damage Numbers
- Graphics & Audio settings
- Enemy Animation Support
- Ammo counter
- Voice Line Functionality
- In-game menu
- Many, many bugfixes

Evelien (scrum master & AI engineer)

- Sound design (tank & out of combat)
- Assembling In-game menu
- Functionality & implementation main menu
- Spell cooldowns
- Many, many bugfixes

Eden (lead & character artist)

- A lot of anything at all moments
- Enemy animations
- Enemy audio
- UI (endscreen and HUD)

Branimir (environment artist)

- Background image
- Title for the menu
- Spell icons
- Voice Lines

Dennis (weapon & environment artist)

Planning

- Trello board
- (Daily) builds
- Burndown Chart

Planning Review

Do's:

- Trello board
- Sprint planning
- Style guide

Don'ts:

- Overscope
- Crunch

Project content structure

This is the ideal folder structure for the project, with files being organized in a specific way. Some example files are placed into the folders.

```
Assets
├── Scenes
│   ├── Frontend
│   │   ├── MainMenu
│   │   └── LevelSeccion
│   ├── Act1
│   │   └── Level1
│   ├── Lighting
│   │   ├── HDRI
│   │   └── Lut
│   ├── Textures
│   ├── Terrain
│   └── TerrainLayers
```

Github

- Strict gitflow
- Merge into develop
- Reviews required
- Main branch releases

Game Reflection

- Very positive
- Better testing (more & earlier)
- Don't immediately disregard a problem if it's on one computer
- Don't overscope

Playtest results

- Survey testing / observing
- Bugs and balancing

Did you have fun playing our game?

6 responses

← After

Our achievements during this project

- Gained experience working in a team
- Improving communication and tracking progress
- Artists: experience with UV-mapping & texturing
- Getting to try new things
- Coming up with creative solutions to problems
- Bugfixing

Rubric (Hard Skills)

Hard Skills	Insufficient 0 points	Sufficient 0.75 points	Good 1 point	Excellent 1.25 points	Criterion Score
Technical Aspects	Missing key features. Build is faulty or broken. Serious bugs are present.	Key features are implemented. Project was delivered as a working build. No serious bugs.	Up to Two of the Excellent Criteria.	Advanced features and functionalities. ✓ Project uses self-made tooling. Technical aspects are optimized given the target platform(s).	/ 1.25
Interaction Aspects	Missing key interactions. Interactions are unclear or faulty. Players do not know what do do. No or insufficient user feedback.	Key interaction is present. Interaction are clear and achieve their goal. User feedback is appropriate.	Up to Two of the Excellent Criteria.	Advanced and intuitive interactions. ✓ Responsive and user-tailored interactions. Dynamic and immersive user feedback.	/ 1.25
Content Aspects	Missing core content. Lack of content consistency. Unoptimized or faulty content.	Core content is present. Minimal consistency between content elements. Technical requirements for the content were accounted for.	Up to Two of the Excellent Criteria.	High quality content. ✓ Content is consistent and provides a polished look & feel. Content is optimized and/or adaptative.	/ 1.25

- Technical Aspects: Excellent
- Interaction Aspects: Excellent
- Content Aspects: Excellent

Rubric (Core Skills)

Group	Insufficient 0 points	Sufficient 1.5 points	Good 2 points	Excellent 2.5 points	Criterion Score
Planning & Team Work	No planning strategy. Lack of effort or enough (quality) work. Problematic and inefficient collaboration.	Basic planning was present (clear task division & milestones). Team effort was balanced and reflect the available project time. Proper tools for collaboration are used.	Up to Two of the Excellent Criteria.	Good use of planning methods (e.g. sprint planning, conditions of satisfaction, etc.). Team behaves professionally and consistent in their efforts. Collaboration tools are used to improve the workflow and team efficiency.	/ 2.5

- Planning & team work: Excellent
- Prototype & test: Excellent

Assessing	Insufficient 0 points	Sufficient 1.25 points	Good 1.65 points	Excellent 2 points	Criterion Score
Prototype & Test	No prototypes were developed. No test session was conducted. Test results were discarded.	Basic prototypes were developed and tested. At least one test session was conducted. Test results were used to improve/adapt the final product.	Up to Two of the Excellent Criteria.	Multiple prototypes were developed or iterations were performed on a prototype. Multiple test sessions were conducted and led to iterations and improvements. Use of proper test methodologies (e.g. A/B testing) during at least one test session.	/ 2

Rubric (Project Frontiers)

Project Specific	Insufficient 0 points	Sufficient 1 point	Good 1.35 points	Excellent 1.75 points	Criterion Score
Project Frontiers	The game lacks a gameplay loop. The gameplay is uninteresting or not engaging. The game is still in a draft/incomplete stage	The gameplay loop is simple in one scenario and a short narrative. The gameplay loop is engaging (and fun). The game is a good portfolio piece for the students.	Up to Two of the Excellent Criteria.	The gameplay loop spans over multiple scenes and/or with an engaging narrative. The gameplay loop's engagement is based on game design principles to achieve its goal. The game is available in an online platform (e.g. itch.io) as a professional portfolio piece.	/ 1.75

- Project Frontiers: Excellent

Thank you
