

Project Frontiers

Sprint 1

By  **Shrimp Council**

Game Concept

Gameplay

- First person shooter
- Start-to-end level
- Gun pick ups
- Patrolling enemies
- Companion following

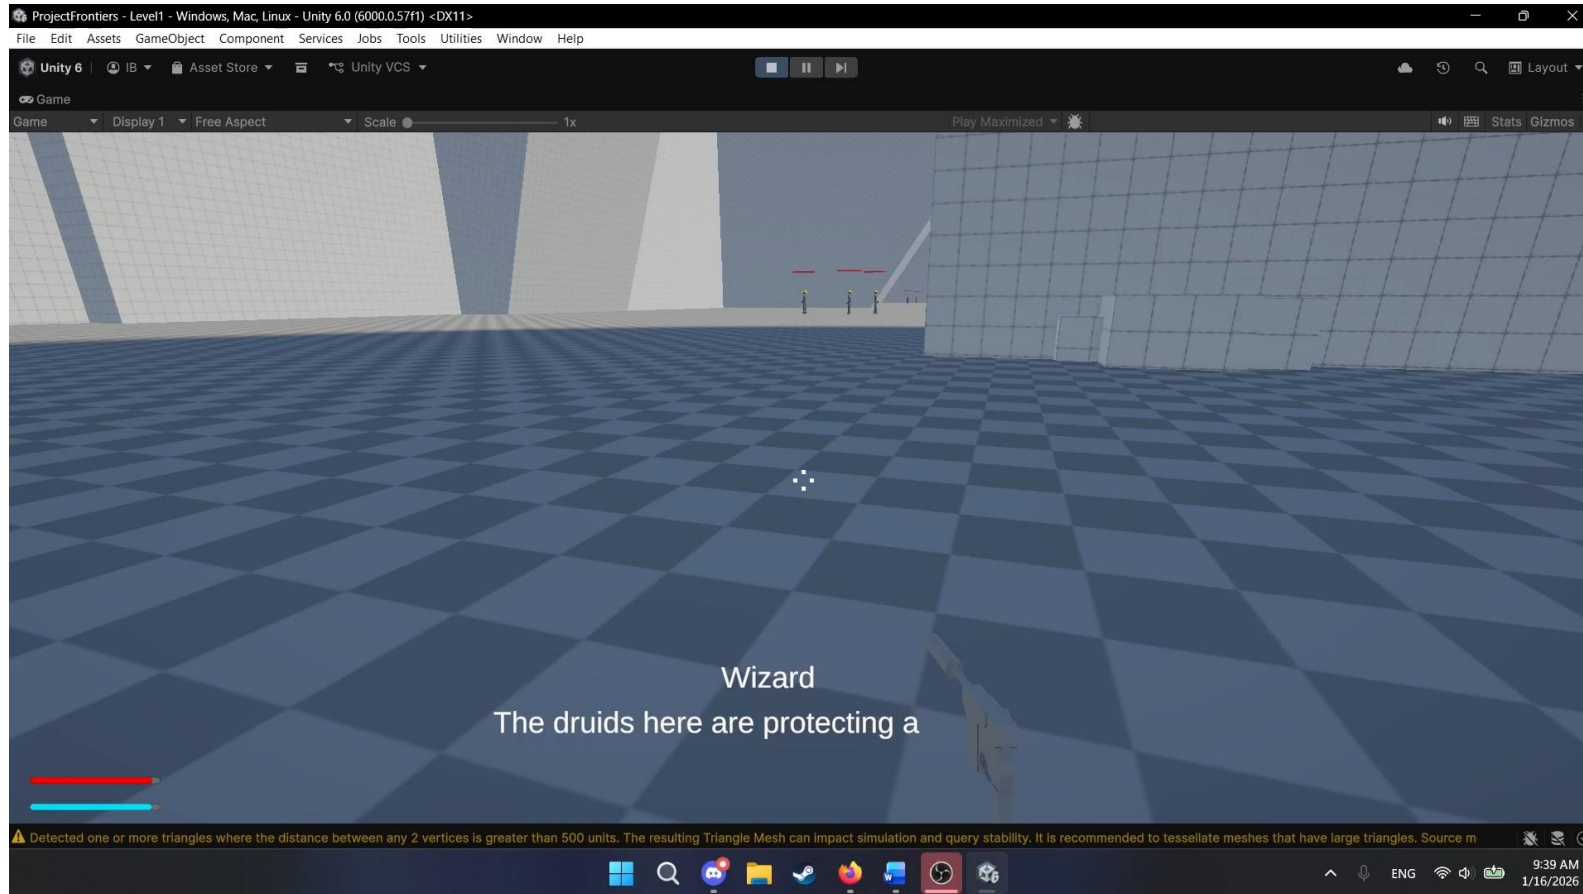

Narrative

- Polymorphed duck apprentice
- Revenge on hippie-druids
- Apprentice wants to tell wizard (player) something
- Body positivity

Visuals

- Eco brutalism
- Ruined, overgrown city
- Magic in apocalyptic setting
- Low to mid-poly

Progress

Team organization

Roles of the team + responsibilities

Team lead, engineer lead and product owner (Systems): Ingmar van Busschbach

Scrum master and engineer (AI): Evelien de Wals

Lead designer (Level & visual): Jay Ahne

Designer (Narrative & Gameplay): Selkie Vosseberg

Lead artist (Environment): Branimir Nikolov

Artist (Weapons & Environment): Dennis Mržljak

Artist (Characters): Eden de Haan

Team rules

3. Team Rules

Work from 9:15 to 17:00

Work at OTSWO or designated classrooms, unless discussed otherwise.

We shall respect each other, which includes but is not limited to: When communicating we shall not raise our voices, talk over each other, or behave unprofessionally through insults or personal attacks.

We can take breaks for mental health, smoke breaks or food breaks, and remind each other to take these breaks where needed. We hold each other accountable to keep these breaks no longer than necessary.

We assist each other with technical problems where possible.

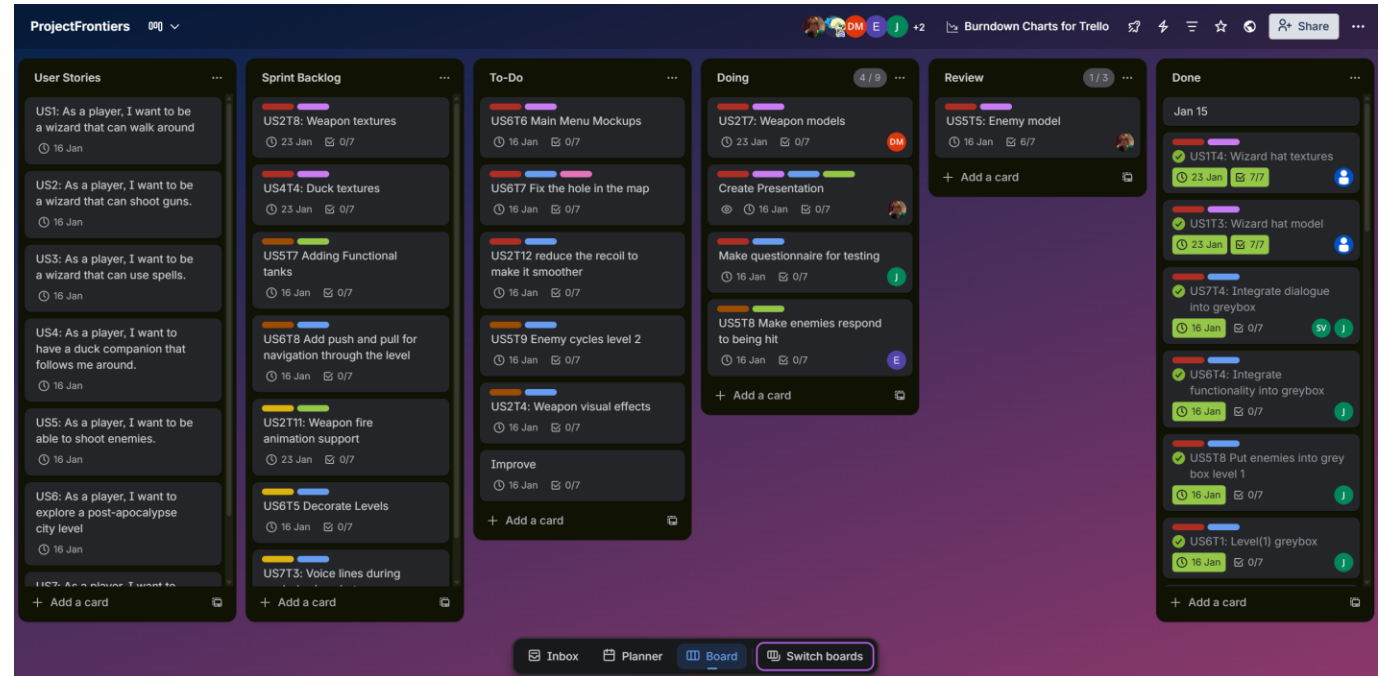

<https://ingmars-organization.gitbook.io/unity-styleguide/> We follow this style guide for naming conventions, asset workflow, git workflow and coding conventions.

The discipline leads bear responsibility for the work tempo of their discipline team members, and should raise tempo issues with the other discipline leads in case there is need for a yellow card to be issued.

The team lead is also the product owner and bears the responsibility of ensuring that the team members follow the sprint planning.

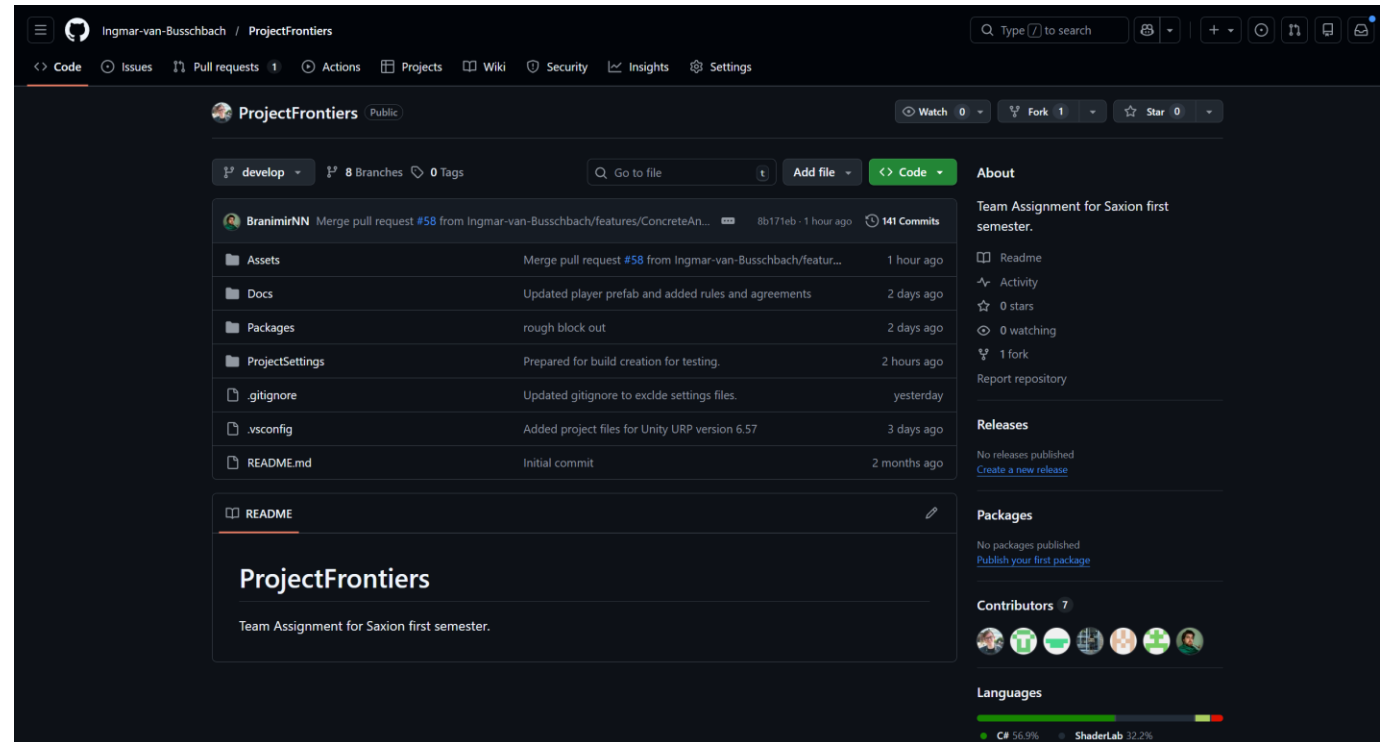

Trello Board

- Scrumban
- Limited doing slots
- Limited review slots
- User stories

Github

- Strict gitflow
- Merge into develop
- Reviews required
- Main branch releases

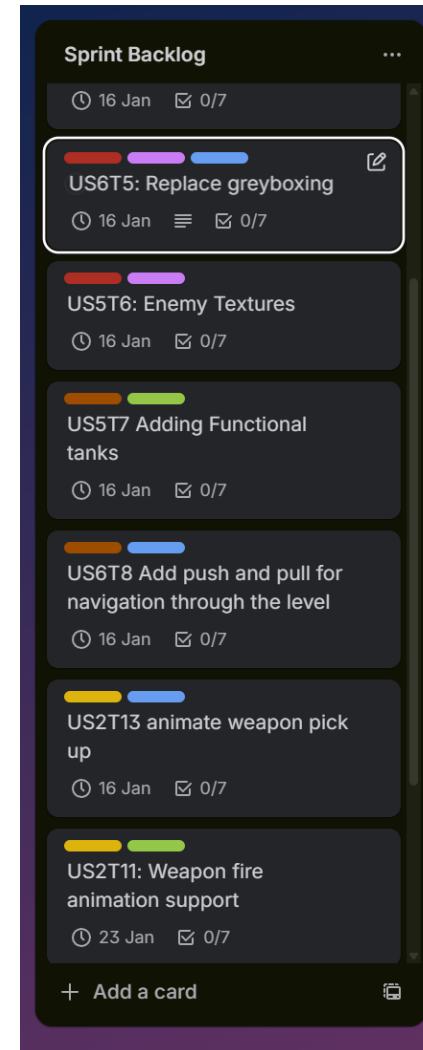

Planning for sprint 2

Goals for next week

To do:

- Finishing, UV-mapping and texturing 3D models
- Replacing greybox
- Audio
- Improving core gameplay functionality
- (minor goals to be added along the way)

Rubric Assessment

Rubric (Hard Skills)

Hard Skills	Insufficient 0 points	Sufficient 0.75 points	Good 1 point	Excellent 1.25 points	Criterion Score
Technical Aspects	Missing key features. Build is faulty or broken. Serious bugs are present.	Key features are implemented. Project was delivered as a working build. No serious bugs.	Up to Two of the Excellent Criteria. 	Advanced features and functionalities. Project uses self-made tooling. Technical aspects are optimized given the target platform(s).	/ 1.25
Interaction Aspects	Missing key interactions. Interactions are unclear or faulty. Players do not know what to do. No or insufficient user feedback.	Key interaction is present. Interaction are clear and achieve their goal. User feedback is appropriate. 	Up to Two of the Excellent Criteria.	Advanced and intuitive interactions. Responsive and user-tailored interactions. Dynamic and immersive user feedback.	/ 1.25
Content Aspects	Missing core content. Lack of content consistency. Unoptimized or faulty content.	Core content is present. Minimal consistency between content elements. Technical requirements for the content were accounted for. 	Up to Two of the Excellent Criteria.	High quality content. Content is consistent and provides a polished look & feel. Content is optimized and/or adaptative.	/ 1.25

- Technical Aspects: good (still need optimizing regarding target platform)
- Interaction Aspects: Sufficient (user-tailored interactions and immersive user feedback still needed)
- Content Aspects: Sufficient (content is consistent)

Rubric (Core Skills)

Group	Insufficient 0 points	Sufficient 1.5 points	Good 2 points	Excellent 2.5 points	Criterion Score
Planning & Team Work	No planning strategy. Lack of effort or enough (quality) work. Problematic and inefficient collaboration.	Basic planning was present (clear task division & milestones). Team effort was balanced and reflect the available project time. Proper tools for collaboration are used.	Up to Two of the Excellent Criteria.	Good use of planning methods (e.g. sprint planning, conditions of satisfaction, etc.). Team behaves professionally and consistent in their efforts. Collaboration tools are used to improve the workflow and team efficiency.	/ 2.5

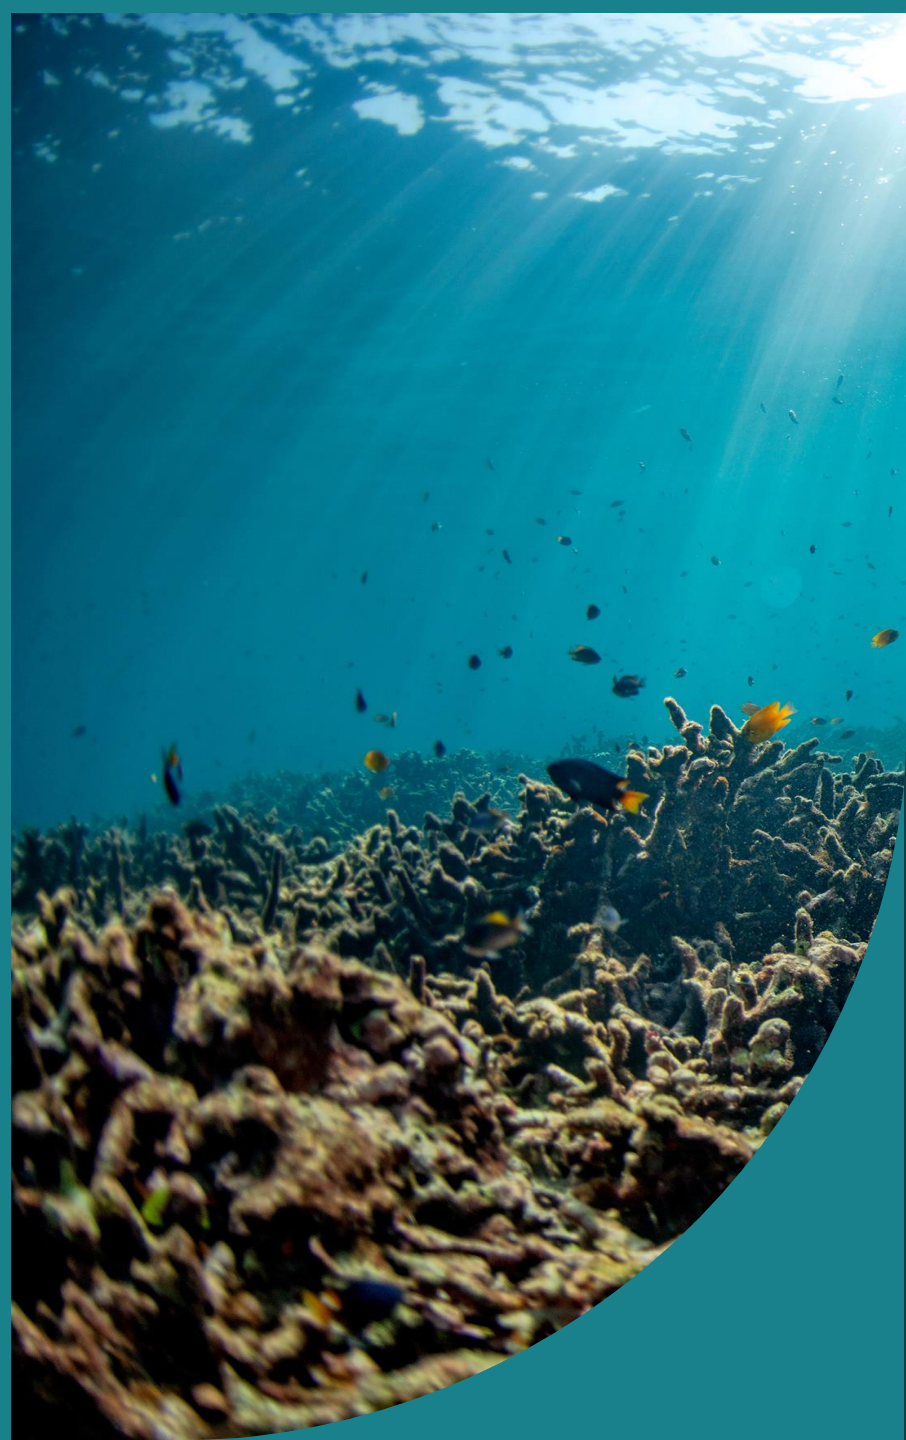

- Planning & team work: excellent
- Prototype & test: sufficient (one test run has been done and product has been iterated)

Assessing	Insufficient 0 points	Sufficient 1.25 points	Good 1.65 points	Excellent 2 points	Criterion Score
Prototype & Test	No prototypes were developed. No test session was conducted. Test results were discarded.	Basic prototypes were developed and tested. At least one test session was conducted. Test results were used to improve/adapt the final product.	Up to Two of the Excellent Criteria.	Multiple prototypes were developed or iterations were performed on a prototype. Multiple test sessions were conducted and led to iterations and improvements. Use of proper test methodologies (e.g. A/B testing) during at least one test session.	/ 2

Rubric (Project Frontiers)

- Project Frontiers: Insufficient? (No gameplay loop yet)

Project Specific	Insufficient 0 points	Sufficient 1 point	Good 1.35 points	Excellent 1.75 points	Criterion Score
Project Frontiers	The game lacks a gameplay loop. The gameplay is uninteresting or not engaging. The game is still in a draft/incomplete stage 	The gameplay loop is simple in one scenario and a short narrative. The gameplay loop is engaging (and fun).  The game is a good portfolio piece for the students. 	Up to Two of the Excellent Criteria.	The gameplay loop spans over multiple scenes and/or with an engaging narrative. The gameplay loop's engagement is based on game design principles to achieve its goal. The game is available in an online platform (e.g. itch.io) as a professional portfolio piece.	/ 1.75

Magazine Size: 6

Reload Duration: 1

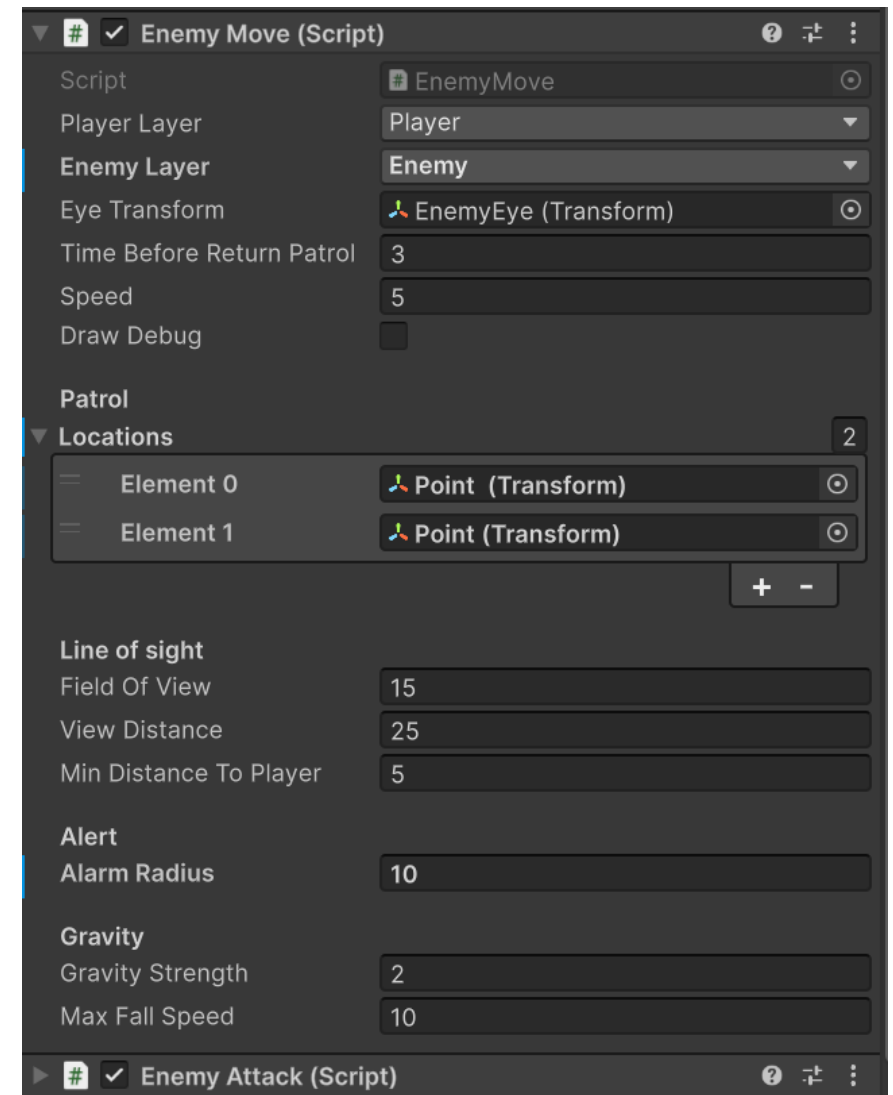

Audio

Firing Audio: S_RifleShot

Reload Audio: S_Reload

Evelien

- Health system
- Companion follow system
- EnemyAI scripts

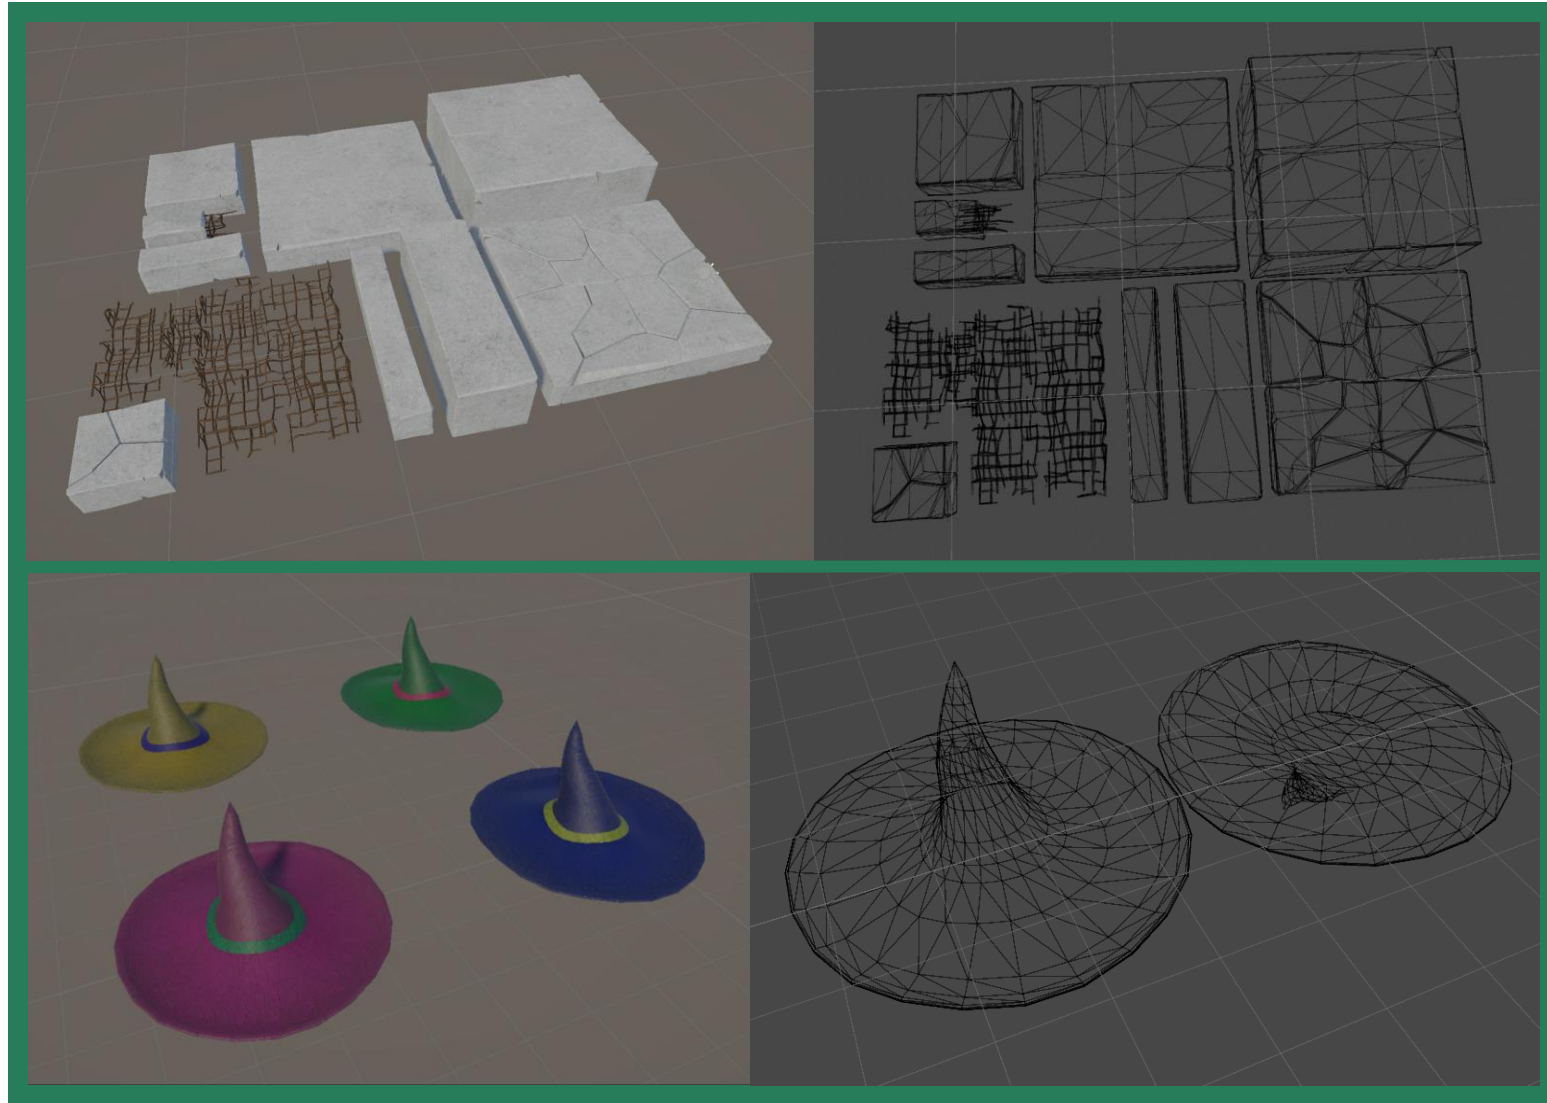

Artists' work

Blockouts, some final models and texturing

Branimir

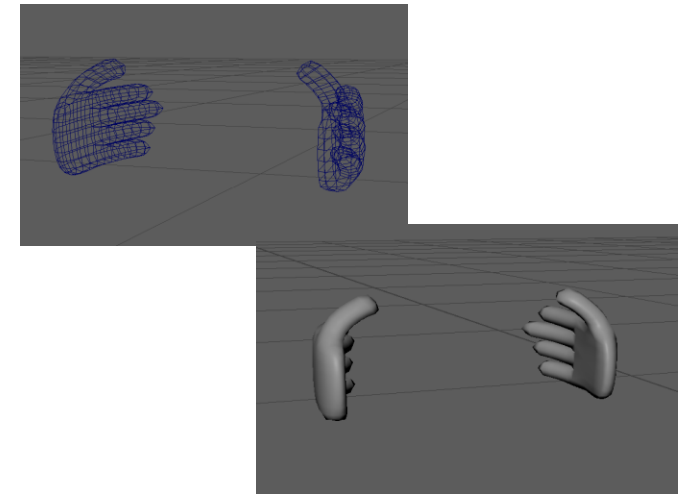

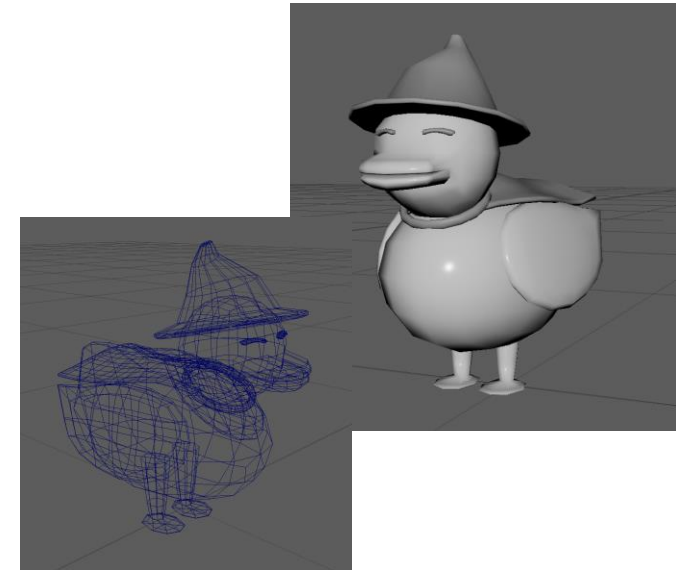

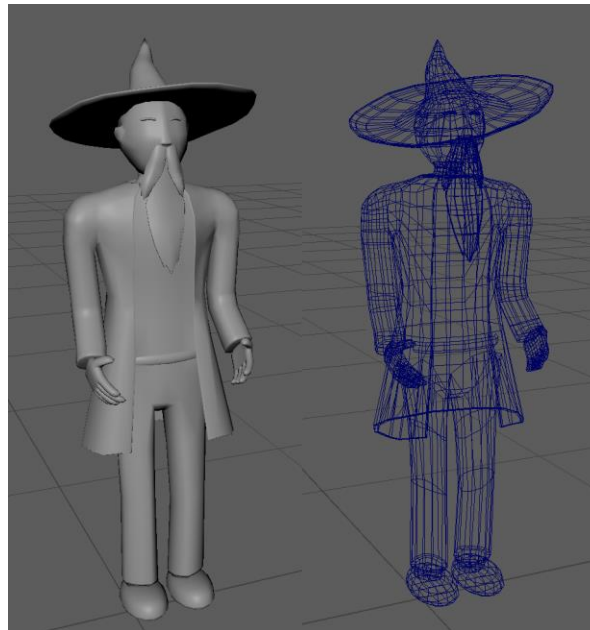

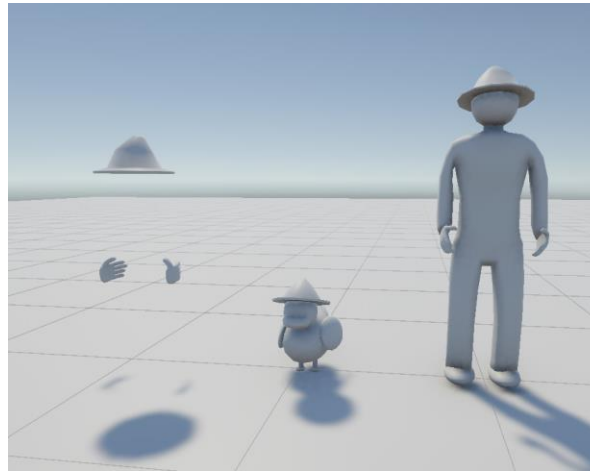

- A set of modular concrete block and rebar assets to supplement the few suitable assets from the Unity Store.
- A wizard hat asset with multiple color variants.

All fully modeled, UVed and textured.

Eden

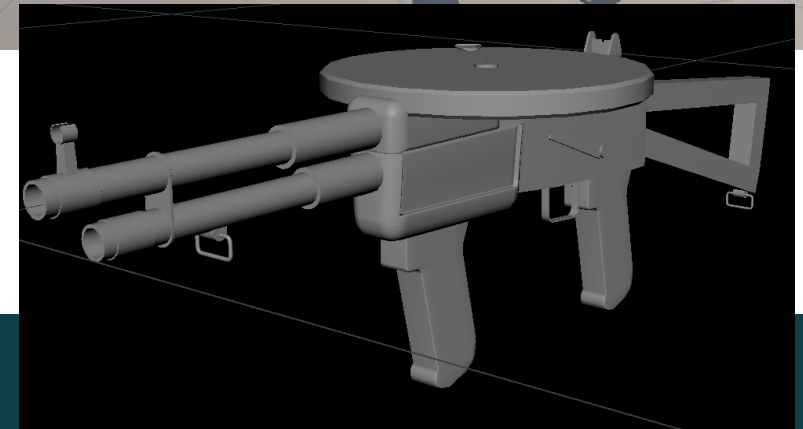

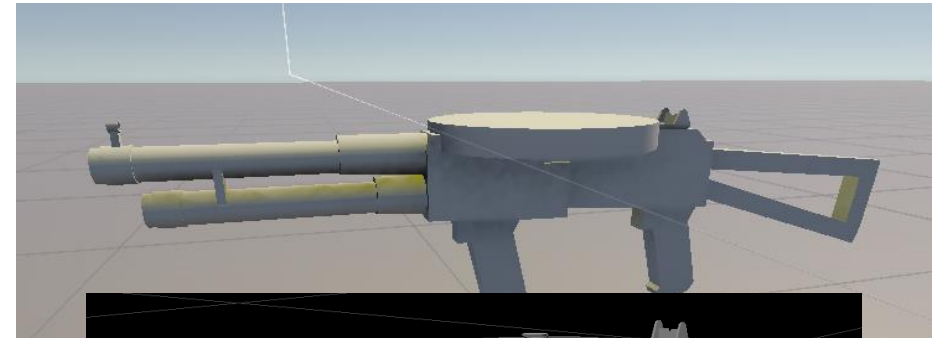

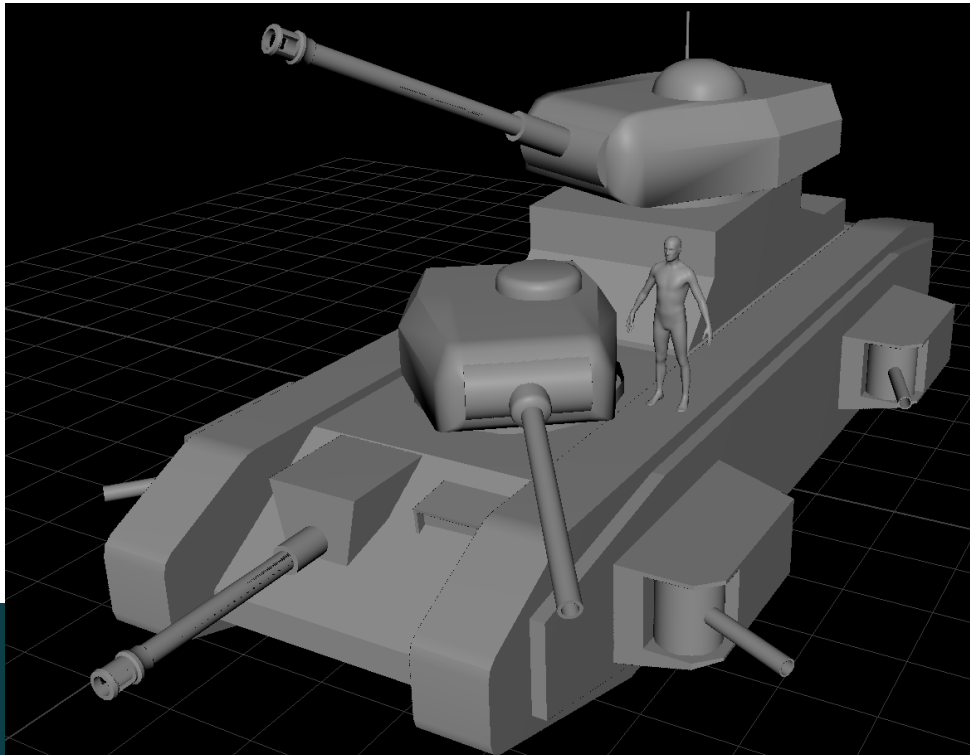

- Created blockouts for characters
- Final model for:
Duck Apprentice
Enemy

Dennis

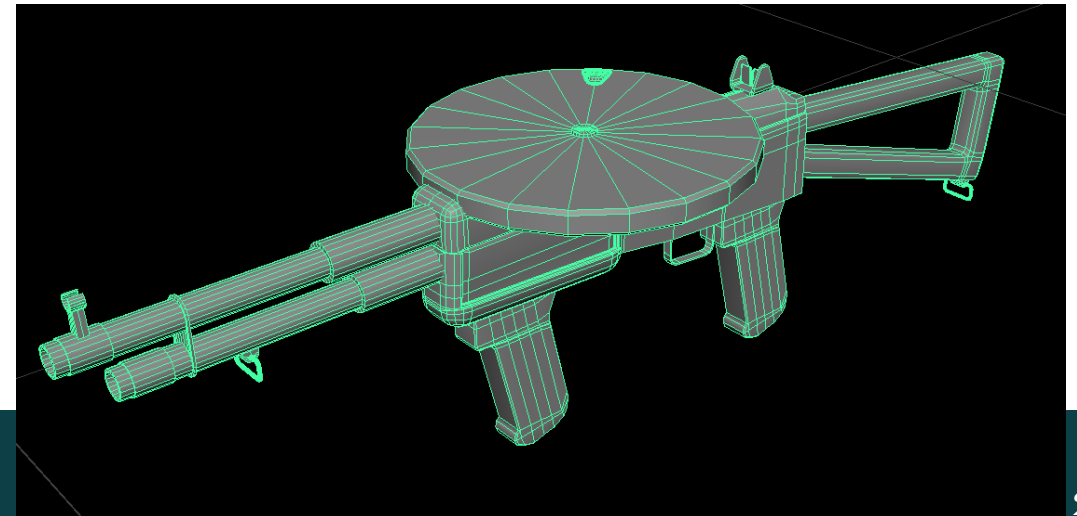

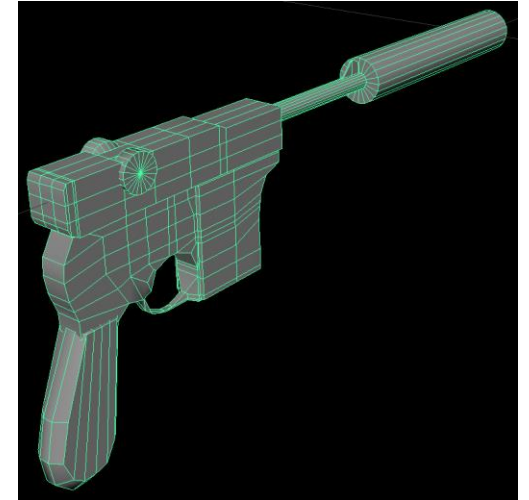

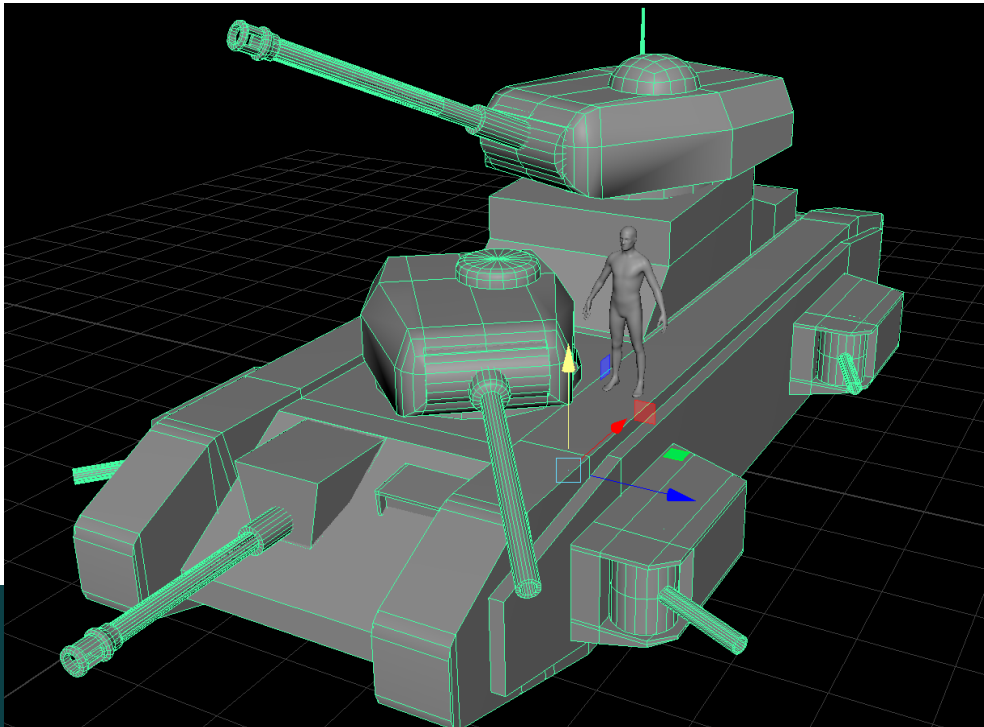

- Created concept and models for weapons and environment

Dennis

- Created concept and models for weapons and environment

A stylized illustration of a blue fish, possibly a shark or a large ray, swimming towards the right. The fish is rendered in various shades of blue with a thick dark blue outline. It has a large eye, a wide mouth with sharp teeth, and a long, curved dorsal fin. The background is a solid light blue color.

Thank you
